LRND—NYLIM U.S. Large Cap R&D Leaders ETF†

All data as of 6/30/26

Fund description: The Fund seeks investment results that track, before fees and expenses, the price and yield performance of the NYLIM U.S. Large Cap R&D Leaders Index, an index that seeks to provide exposure to innovative companies by investing in U.S. large-cap equity securities of companies that demonstrate consistent and effective use of R&D investment.

Innovation-Driven Growth

Gain exposure to companies driving future growth through sustained R&D investment and a track record of innovation.

Efficient Capital Allocation

Target companies that convert R&D spend into future earnings — screened by proprietary metrics combining R&D intensity with ROIC.

Core Exposure to Tomorrow's Leaders

A growth-oriented portfolio focused on innovators shaping transformative technologies and long-term performance potential.

Returns represent past performance which is no guarantee of future results. Current performance may be lower or higher. Investment return and principal value will fluctuate, and shares, when redeemed, may be worth more or less than their original cost. Performance reflects a contractual fee waiver and/or expense limitation agreement in effect until terminated by the board of Trustees of the ETF, without which total returns may have been lower. Visit nylim.com for the most recent month-end performance. Expenses stated are as of the fund's most recent prospectus.

Portfolio data as of 6/30/26. Percentages based on total net assets and may change daily.

Shares are bought and sold at market price (not NAV) and are not individually redeemed from the Fund. Net asset value (NAV) returns are calculated using the daily NAV as of the close of regular trading on the Fund's primary exchange (typically 4:00pm ET). Effective August 31, 2025, the price used to calculate market price (MP) returns is the Fund's official closing price. Prior to August 31, 2025, market price returns were determined using the mean between the day's last bid and ask prices on the fund's primary exchange. The market price returns do not represent returns an investor would receive if shares were traded at other times.

Index performance is for illustrative purposes only and does not represent actual Fund performance. One cannot invest directly in an index. Performance data for the Index assumes reinvestment of dividends and is net of the management fees for the Index's components, as applicable, but it does not reflect management fees, transaction costs or other expenses that you would pay if you invested in the Fund directly. No representation is being made that any investment will achieve performance similar to that shown.

†Effective 8/28/26, NYLI U.S. Large Cap R&D Leaders ETF was renamed NYLIM U..S. Large Cap R&D Lead ETF.

The Morningstar Medalist Ratings are not statements of fact, nor are they credit or risk ratings. The Morningstar Medalist Rating (i) should not be used as the sole basis in evaluating an investment product, (ii) involves unknown risks and uncertainties which may cause expectations not to occur or to differ significantly from what was expected, (iii) are not guaranteed to be based on complete or accurate assumptions or models when determined algorithmically, (iv) involve the risk that the return target will not be met due to such things as unforeseen changes in management, technology, economic development, interest rate development, operating and/or material costs, competitive pressure, supervisory law, exchange rate, tax rates, exchange rate changes, and/or changes in political and social conditions, and (v) should not be considered an offer or solicitation to buy or sell the investment product. A change in the fundamental factors underlying the Morningstar Medalist Rating can mean that the rating is subsequently no longer accurate.

Before You Invest

Before considering an investment in the Fund, you should understand that you could lose money.

Principal Risks

Equity Securities Risk

Investments in common stocks and other equity securities are particularly subject to the risk of changes in investors' perceptions of the financial condition of an issuer, conditions affecting equity markets generally and political and/or economic events. Equity prices may also be particularly sensitive to rising interest rates, as the cost of capital rises and borrowing costs increase.

Large-Capitalization Companies Risk

Large-capitalization companies may be less able than smaller capitalization companies to adapt to changing market conditions. Large-capitalization companies may be more mature and subject to more limited growth potential compared with smaller capitalization companies. During different market cycles, the performance of large-capitalization companies has trailed the overall performance of the broader securities markets.

Non-Diversified Risk

The Fund is classified as a "non-diversified" investment company under the Investment Company Act of 1940 (the "1940 Act"), which means it may invest a larger percentage of its assets in a smaller number of issuers than a diversified fund. To the extent the Fund invests its assets in a smaller number of issuers, the Fund will be more susceptible to negative events affecting those issuers than a diversified fund.

Industry/Sector Concentration Risk

The Fund's investment of a large percentage of its assets in the securities of issuers within the same industry or sector means that an adverse economic, business or political development may affect the value of the Fund's investments more than if the Fund were more broadly diversified. A concentration makes the Fund more susceptible to any single occurrence and may subject the Fund to greater market risk than a fund that is not so concentrated.

The NYLIM U.S. Large Cap R&D Leaders Index seeks to provide exposure to highly innovative companies through the selection of Large-cap equities with the highest R&D spending in the past one year. Companies with high R&D spending are investing for future growth in their business and may enjoy strong long-term competitive positioning.

The Russell 1000® Growth Index measures the performance of the large-cap growth segment of the U.S. equity universe. It includes those Russell 1000® Index companies with higher price-to-book ratios and higher forecasted growth values. The Russell 1000® Growth Index is generally representative of the market sectors or types of investments in which the Fund invests

The constituents of the Russell 1000® Index were used by New York Life Investment Management LLC ("NYLIM") as the starting universe for selection of the companies included in the NYLIM U.S. Large Cap R&D Leaders Index. FTSE International Limited and its affiliates ("FTSE Russell") do not in any way create, calculate, maintain, review, sponsor, support, promote or endorse the NYLIM U.S. Large Cap R&D Leaders Index or the NYLIM U.S. Large Cap R&D Leaders ETF. In no event shall any FTSE Russell party have any liability for any direct, indirect, special, incidental, punitive, consequential (including without limitation lost profits) or any other damages in connection with the constituents of the Russell 1000® Index or the NYLIM U.S. Large Cap R&D Leaders Index.

1. *Percentages based on total net assets and subject to change without notice.* ***4***. *The Morningstar Rating™ for funds, or "star rating", is calculated for managed products (including mutual funds, variable annuity and variable life subaccounts, exchange-traded funds, closed-end funds, and separate accounts) with at least a three-year history. Exchange-traded funds and open-ended mutual funds are considered a single population for comparative purposes. It is calculated based on a Morningstar Risk-Adjusted Return measure that accounts for variation in a managed product's monthly excess performance, placing more emphasis on downward variations and rewarding consistent performance (this does not include the effects of sales charges, loads, and redemption fees). The top 10% of products in each product category receive 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars, the next 22.5% receive 2 stars, and the bottom 10% receive 1 star. The Overall Morningstar Rating for a managed product is derived from a weighted average of the performance figures associated with its three-, five-, and 10-year (if applicable) Morningstar Rating metrics. The weights are: 100% three-year rating for 36-59 months of total returns, 60% five-year rating/40% three-year rating for 60-119 months of total returns, and 50% 10-year rating/30% five-year rating/20% three-year rating for 120 or more months of total returns. While the 10-year overall star rating formula seems to give the most weight to the 10-year period, the most recent three-year period actually has the greatest impact because it is included in all three rating periods.*

Price/Earnings Ratio *is a valuation of a company's current share price compared to its per-share earnings and is not intended to demonstrate growth or income.* ***Price/Book Ratio*** *is used to compare a company's stock's value to its book value and is not intended to demonstrate growth or income.*

The Morningstar Medalist Rating™ is the summary expression of Morningstar's forward-looking analysis of investment strategies as offered via specific vehicles using a rating scale of Gold, Silver, Bronze, Neutral, and Negative. The Medalist Ratings indicate which investments Morningstar believes are likely to outperform a relevant index or peer group average on a risk-adjusted basis over time. Investment products are evaluated on three key pillars (People, Parent, and Process) which, when coupled with a fee assessment, forms the basis for Morningstar's conviction in those products' investment merits and determines the Medalist Rating they're assigned. Pillar ratings take the form of Low, Below Average, Average, Above Average, and High. Pillars may be evaluated via an analyst's qualitative assessment (either directly to a vehicle the analyst covers or indirectly when the pillar ratings of a covered vehicle are mapped to a related uncovered vehicle) or using algorithmic techniques. Vehicles are sorted by their expected performance into rating groups defined by their Morningstar Category and their active or passive status. When analysts directly cover a vehicle, they assign the three pillar ratings based on their qualitative assessment, subject to the oversight of the Analyst Rating Committee, and monitor and reevaluate them at least every 14 months. When the vehicles are covered either indirectly by analysts or by algorithm, the ratings are assigned monthly. For more detailed information about these ratings, including their methodology, please go to *global.morningstar.com/managerdisclosures/*.

Consider the Funds' investment objectives, risks, charges, and expenses carefully before investing. The prospectus and summary prospectus include this and other information about the Funds and are available by visiting the Prospectus. Read the prospectus carefully before investing.

Fund shares are not individually redeemable and will be issued and redeemed at their NAV only through certain authorized broker-dealers in large, specified blocks of shares called "creation units", and otherwise, can be bought and sold only through exchange trading. Creation units are issued and redeemed principally in-kind.
