

NYLI MacKay Short Duration High Income Fund[†]

Formerly MainStay MacKay Short Duration High Income Fund

A: MDHAX | C: MDHCX | I: MDHIX

All data as of 03/31/26

Short duration with potential for long-term opportunity

Seeks: High current income. Capital appreciation is a secondary objective.

Morningstar Category: High Yield Bond

Benchmark: ICE BofA 1-5 Yr BB-B US HY Corp Cash Pay Index

Attractive return potential with low risk

The team seeks to generate alpha by investing in relative higher quality high yield with strong credit profiles and a target duration of less than 3 years.

Intensive credit research

Combined with strong credit selection, the team relies on "margin-of-safety" analysis to identify companies with thorough asset coverage and free cash flow.

Credit specialists

MacKay Shields has over 40 years of experience with a focus on fixed income investing.

Returns represent past performance which is no guarantee of future results. Current performance may be lower or higher. Investment return and principal value will fluctuate, and shares, when redeemed, may be worth more or less than their original cost. Performance reflects a contractual fee waiver and/or expense limitation agreement in effect through 2/28/27, without which total returns may have been lower. This agreement renews automatically for one-year terms unless written notice is provided prior to the start of the next term or upon approval of the Board. No initial sales charge applies on investments of \$250,000 or more (and certain other qualified purchases). However, a contingent deferred sales charge of 1.00% may be imposed on certain redemptions made within 18 months of the date of purchase on shares that were purchased without an initial sales charge. Visit nylim.com for the most recent month-end performance. Expenses stated are as of the fund's most recent prospectus.

[†]Effective 8/28/24, MainStay MacKay Short Duration High Income Fund was renamed NYLI MacKay Short Duration High Income Fund.

Fund Statistics³

Fund Inception	12/17/12
Total Net Assets (all classes)	\$2.9 B
Distribution Frequency	Monthly
Number of Holdings	460
Annual Turnover Rate (%)	33

	Fund	Benchmark
Effective Maturity	3.6 Yrs	4.0 Yrs
Modified Duration to Worst	2.0 Yrs	2.4 Yrs

	Class A	
Standard Deviation (3yr) (%)	2.15	3.20
Beta (3yr)	0.64	N/A
R-Squared (3yr)	0.94	N/A
Sharpe Ratio (3yr)	0.80	0.93

	Class A	Class I
Yields and Distributions		
SEC 30-Day Yield	5.36	5.78
Unsubsidized 30-Day Yield	5.35	5.78
Last Distribution: Mar 2026 (\$)	0.0479	0.0498

SEC 30-Day Yield is based on net investment income for the 30-day period ended 03/31/26 divided by the offering price Per share on that date. Yields for other share classes will vary. Unsubsidized 30-Day Yield reflects what the yield would have been without the effect of waivers and/or reimbursements. Please note that there was no reimbursement for this time period.

NYLI MacKay Short Duration High Income Fund

Credit Quality Breakdown (%)

■ BBB:5.8%
■ BB:63.4%
■ B:27.9%
■ CCC And Below:2.1%
■ Not Rated:0.8%

Percentages are based on fixed-income securities held in the Fund's investment portfolio and exclude any equity or convertible securities, credit default swaps, and cash or cash equivalents. Ratings apply to the underlying portfolio of debt securities held by the Fund and are rated by an independent rating agency, such as Standard and Poor's or Moody's. If ratings are provided by three rating agencies, but differ, the middle rating will be utilized. If ratings are provided by two rating agencies, but differ, the higher rating will be utilized. If only one rating is provided, the available rating will be utilized. Securities that are unrated by the rating agencies are reflected as such in the breakdown. Unrated securities do not necessarily indicate low quality. S&P rates borrowers on a scale from AAA to D. AAA through BBB represent investment grade, while BB through D represent non-investment grade.

Before You Invest

Before considering an investment in the Fund, you should understand that you could lose money.

The Fund is not a money market fund and does not attempt to maintain a stable NAV. The Fund's NAV per share will fluctuate. Investing in below investment grade securities may carry a greater risk of nonpayment of interest or principal than higher-rated bonds. Foreign securities are subject to interest rate, currency exchange rate, economic, and political risks. These risks may be greater for emerging markets.

Floating rate loans are generally considered to have speculative characteristics that involve default risk of principal and interest, collateral impairment, borrower industry concentration, and limited liquidity. Issuers of convertible securities may not be as financially strong as those issuing securities with higher credit ratings and are more vulnerable to changes in the economy. The Fund may invest in derivatives, which may increase the volatility of the Fund's NAV. Funds that invest in bonds are subject to interest-rate risk and can lose principal value when interest rates rise. Bonds are also subject to credit risk, in which the bond issuer may fail to pay interest and principal in a timely manner, or that negative perception of the issuer's ability to make such payments may cause the price of that bond to decline.

1. Average annual total returns include the change in share price and reinvestment of dividends and capital gain distributions. Class I shares are generally only available to corporate and institutional investors. Class R shares are available only through corporate-sponsored retirement plans. **2. The ICE BofA 1-5 Year BB-B U.S. High Yield Corporate Cash Pay Index** generally tracks the performance of BB-B rated U.S. dollar-denominated corporate bonds publicly issued in the U.S. domestic market with maturities of 1 to 5 years. Index results assume the reinvestment of all capital gain and dividend distributions. An investment cannot be made directly into an index. The ICE BofA 1-5 Year BB-B U.S. High Yield Corporate Cash Pay Index is generally representative of the market sectors or types of investments in which the Fund invests. **3. Standard deviation** measures how widely dispersed a fund's returns have been over a specified period of time. A high standard deviation indicates that the range is wide, implying greater potential for volatility. **Beta** is a measure of historical volatility relative to an appropriate index (benchmark) based on its investment objective. A beta greater than 1.00 indicates volatility greater than the benchmark's. **R-Squared** measures the percentage of a fund's movements that result from movements in the index. The **Sharpe Ratio** shown is calculated for the past 36-month period by dividing annualized excess returns by annualized standard deviation. **Effective Maturity** is the average time to maturity of debt securities held in the portfolio, taking into consideration the possibility that the issuer may call the bond before its maturity date. **Modified Duration to Worst** is the duration of a bond, computed using the bond's nearest call date or maturity, whichever comes first. This measure ignores future cash flow fluctuations due to embedded optionality. The **Annual Turnover Rate** measures how quickly securities in the Fund are either bought or sold during the 12 months as of the most recent annual shareholder report. **Alpha** measures the deviation between a security or portfolio's actual returns and its expected performance based on risk (beta). It signifies the value a portfolio manager adds or subtracts.

Consider the Funds' investment objectives, risks, charges, and expenses carefully before investing. The prospectus and summary prospectus include this and other information about the Funds and are available by visiting the [Prospectus](#). Read the prospectus carefully before investing.
