

NYLI MacKay Utah Muni Fund^{†‡}

Formerly MainStay MacKay Utah Muni Fund

A: UTAVX | C: UTACX | I: UTAYX | Z: UTAHX

All data as of 03/31/26

Active, dynamic approach to municipal investing

Seeks: Current income exempt from federal and Utah state income taxes.

Morningstar Category: Muni Single State Intermediate

Benchmark: Bloomberg Municipal Bond Index 1-15 Yr Blend

Relative value strategy

The team relies on credit analysis, yield curve positioning, and sector rotation to uncover compelling opportunities.

Focus on risk management

The team emphasizes risk management and does not employ leverage or make interest rate bets.

Tenured team

The co-heads have worked together since 1993 and leverage their long-term relationships with municipal dealers to help drive success.

Fund Expenses (%)

| | A | C | I | Z |
|--------------------------------------|------|------|------|------|
| Total Annual Fund Operating Expenses | 0.83 | 1.13 | 0.58 | 0.78 |
| Net (After Waivers/Reimbursements) | 0.80 | 1.10 | 0.55 | 0.78 |

Returns represent past performance which is no guarantee of future results. Current performance may be lower or higher. Investment return and principal value will fluctuate, and shares, when redeemed, may be worth more or less than their original cost. Performance reflects a contractual fee waiver and/or expense limitation agreement without which total returns may have been lower. This agreement will remain in effect until 2/28/27, and renew automatically for one-year terms unless written notice is provided prior to the start of the next term or upon approval of the Board. No initial sales charge applies on investments of \$250,000 or more (and certain other qualified purchases). However, a contingent deferred sales charge of 1.00% may be imposed on certain redemptions made within 18 months of the date of purchase on shares that were purchased without an initial sales charge. Visit nylim.com for the most recent month-end performance. Expenses stated are as of the fund's most recent prospectus.

[†]The Fund is available for sale to AK, AL, AR, AZ, CA, CO, CT, GA, GU, HI, IA, ID, IL, IN, KS, KY, LA, MD, ME, MI, MN, MO, MS, MT, NC, NE, NH, NJ, NM, NV, NY, OH, OR, PA, PR, RI, SC, SD, TX, UT, VA, VI, VT, WA, WI and WY residents only. Share class availability varies by state. New York Life Investment Management, and its affiliates and representatives do not provide legal, tax, or accounting advice. Please consult your own legal and tax advisors.

[‡]Effective 8/28/24, MainStay MacKay Utah Muni Fund was renamed NYLI MacKay Utah Muni Fund.

Morningstar Ratings⁴

as of 03/31/26

Class I

Overall Morningstar Rating™ based on the risk-adjusted returns from among 105 Muni Single State Intermediate funds.

| | Stars | # of Funds |
|---------|-------|------------|
| Class I | 3 Yr | 4 |
| | 5 Yr | 4 |
| | 10 Yr | 4 |

| Fund Inception | 7/24/92 |
| Total Net Assets (all classes) | \$199.1 M |
| Distribution Frequency | Monthly* |
| Number of Holdings | 155 |
| Annual Turnover Rate (%) | 74 |

*Accrued daily.

| | Fund | Benchmark |
|----------------------------|----------|-----------|
| Avg. Price (\$) | 101.2 | 105.0 |
| Effective Maturity | 11.8 Yrs | 8.2 Yrs |
| Modified Duration to Worst | 4.8 Yrs | 4.8 Yrs |

| | Class I |
|------------------------------|---------|
| Standard Deviation (3yr) (%) | 4.39 |
| Sharpe Ratio (3yr) | -0.42 |

| | Class A | Class I |
|----------------------------------|---------|---------|
| Distribution Rate | 3.68 | 3.93 |
| Tax-Equivalent Distribution Rate | 6.73 | 7.18 |
| Last Distribution: Mar 2026 (\$) | 0.0295 | 0.0316 |
| SEC 30-Day Yield | 3.23 | 3.58 |
| Unsubsidized 30-Day Yield | 3.19 | 3.53 |
| Tax-Equivalent SEC 30-Day Yield | 5.90 | 6.54 |

SEC 30-Day Yield is based on net investment income for the 30-day period ended 03/31/26 divided by the offering price per share on that date. Yields for other share classes will vary. Unsubsidized 30-Day Yield reflects what the yield would have been without the effect of waivers and/or reimbursements.

Distribution rate is calculated by annualizing the most recent distribution per share (dividing the number of calendar days during the year by the number of calendar days over which the most recent distribution accumulated) and dividing it by the NAV as of 03/31/26. The Fund intends to pay monthly distributions from net investment income.

Tax Equivalent Yield & Tax Equivalent Distribution Rate assumes the maximum regular federal income tax rate (including Medicare tax in effect December 2015) and Utah state rates (45.45%). The fund may hold taxable municipal bonds, reducing the tax-equivalent yield. Tax rates are subject to changes. Tax treatment of Fund distributions vary; investors should consult a tax advisor to determine if the Fund is appropriate for them.

NYLI MacKay Utah Muni Fund

Asset Mix (%)

| | |
|--|------|
| Municipal Revenue Bonds | 90.6 |
| Municipal General Obligation Bonds | 5.6 |
| Cash and Other Assets (less liabilities) | 3.8 |

Credit Quality Breakdown (%)

The Fund's percentages are calculated based on its fixed-income securities, excluding equities, convertibles, and cash. These securities are rated by independent agencies. If multiple ratings are given, the highest is used. Unrated securities are labeled as such in the breakdown, but this doesn't necessarily indicate low quality. S&P's rating scale ranges from AAA (highest quality) to D (lowest quality), with AAA to BBB being investment grade and BB to D being non-investment grade.

Before You Invest

Before considering an investment in the Fund, you should understand that you could lose money.

Municipal Bond risks include the ability of the issuer to repay the obligation, the relative lack of information about certain issuers, and the possibility of future tax and legislative changes, which could affect the market for and value of municipal securities. Bonds face **interest-rate and credit risk**. When interest rates rise, bond values can decrease, and there's a risk that the issuer may not pay interest or principal on time. **High-yield or "junk bonds"** are speculative due to their higher risk of loss compared to higher-quality securities. Because the Fund invests in municipal bonds issued by or on behalf of the **State of Utah**, any deterioration of Utah's fiscal situation and economic situation of its municipalities could cause greater volatility. The Fund is **non-diversified** and the Fund's risk is increased because each investment has a greater effect on the Fund's performance.

1. Average annual total returns include the change in share price and reinvestment of dividends and capital gain distributions. Class I shares are generally only available to corporate and institutional investors. Class R shares are available only through corporate-sponsored retirement plans. Effective July 19, 2024, the Aquila Tax-Free Trust for Utah (the "Predecessor Fund") was reorganized into the Mainstay MacKay Utah Muni Fund ("the Fund"). As accounting successor to the Predecessor Fund, the Fund has assumed the Predecessor Fund's historical performance. Therefore, the performance information shown is that of the Predecessor Fund, which had a different fee structure from the Fund. The returns of the Predecessor Fund have not been adjusted to reflect the applicable expenses of the Fund. **2. The Bloomberg Municipal Bond Index 1-15 Yr Blend** covers the USD-denominated long-term tax exempt bond market. The index has four main sectors: state and local general obligation bonds, revenue bonds, insured bonds and prerefunded bonds. Index results assume the reinvestment of all capital gain and dividend distributions. An investment cannot be made directly into an index. The Bloomberg Municipal Bond Index 1-15 Yr Blend is generally representative of the market sectors or types of investments in which the Fund invests. **3. Standard deviation** gauges the spread of a fund's returns over a period. A high value suggests wider range and more volatility potential. The **Sharpe Ratio** shown is calculated for the past 36-month period by dividing annualized excess returns by annualized standard deviation. The **Annual Turnover Rate** measures how quickly securities in the Fund are traded during the 12 months as of the most recent annual shareholder report. **Effective Maturity** is the average time to maturity of debt securities held in the portfolio, taking into consideration the possibility that the issuer may call the bond before its maturity date. **Modified Duration to Worst** is the duration of a bond, computed using the bond's nearest call date or maturity, whichever comes first. This measure ignores future cash flow fluctuations due to embedded optionality. **Average Price** is based on market value and is the market weighted average of all bonds in the Fund's portfolio, including any zero coupon bonds. **4. The Morningstar Rating™** for funds, or "star rating", is calculated for managed products (including mutual funds, variable annuity and variable life subaccounts, exchange-traded funds, closed-end funds, and separate accounts) with at least a three-year history. Exchange-traded funds and open-ended mutual funds are considered a single population for comparative purposes. It is calculated based on a Morningstar Risk-Adjusted Return measure that accounts for variation in a managed product's monthly excess performance, placing more emphasis on downward variations and rewarding consistent performance (this does not include the effects of sales charges, loads, and redemption fees). The top 10% of products in each product category receive 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars, the next 22.5% receive 2 stars, and the bottom 10% receive 1 star. The Overall Morningstar Rating for a managed product is derived from a weighted average of the performance figures associated with its three-, five-, and 10-year (if applicable) Morningstar Rating metrics. The weights are: 100% three-year rating for 36-59 months of total returns, 60% five-year rating/40% three-year rating for 60-119 months of total returns, and 50% 10-year rating/30% five-year rating/20% three-year rating for 120 or more months of total returns. While the 10-year overall star rating formula seems to give the most weight to the 10-year period, the most recent three-year period actually has the greatest impact because it is included in all three rating periods.

Consider the Funds' investment objectives, risks, charges, and expenses carefully before investing. The prospectus and summary prospectus include this and other information about the Funds and are available by visiting the [Prospectus](#). Read the prospectus carefully before investing.
