The **Morningstar Medalist Ratings** are not statements of fact, nor are they credit or risk ratings. The Morningstar Medalist Rating (i) should not be used as the sole basis in evaluating an investment product, (ii) involves unknown risks and uncertainties which may cause expectations not to occur or to differ significantly from what was expected, (iii) are not guaranteed to be based on complete or accurate assumptions or models when determined algorithmically, (iv) involve the risk that the return target will not be met due to such things as unforeseen changes in changes in management, technology, economic development, interest rate development, operating and/or material costs, competitive pressure, supervisory law, exchange rate, tax rates, exchange rate changes, and/or changes in political and social conditions, and (v) should not be considered an offer or solicitation to buy or sell the investment product. A change in the fundamental factors underlying the Morningstar Medalist Rating can mean that the rating is subsequently no longer accurate.

The Morningstar Medalist Rating™ is the summary expression of Morningstar's forward-looking analysis of investment strategies as offered via specific vehicles using a rating scale of Gold, Silver, Bronze, Neutral, and Negative. The Medalist Ratings indicate which investments Morningstar believes are likely to outperform a relevant index or peer group average on a risk-adjusted basis over time. Investment products are evaluated on three key pillars (People, Parent, and Process) which, when coupled with a fee assessment, forms the basis for Morningstar's conviction in those products' investment merits and determines the Medalist Rating they're assigned. Pillar ratings take the form of Low, Below Average, Average, Above Average, and High. Pillars may be evaluated via an analyst's qualitative assessment (either directly to a vehicle the analyst covers or indirectly when the pillar ratings of a covered vehicle are mapped to a related uncovered vehicle) or using algorithmic techniques. Vehicles are sorted by their expected performance into rating groups defined by their Morningstar Category and their active or passive status. When analysts directly cover a vehicle, they assign the three pillar ratings based on their qualitative assessment, subject to the oversight of the Analyst Rating Committee, and monitor and reevaluate them at least every 14 months. When the vehicles are covered either indirectly by analysts or by algorithm, the ratings are assigned monthly. For more detailed information about these ratings, including their methodology, please go to [global.morningstar.com/managerdisclosures/](https://global.morningstar.com/managerdisclosures/).

## MMIT average annual total returns as of 3/31/26

Ticker		QTR	YTD	1 Yr	3 Yrs	5 Yrs	Since Inception (10/18/17)	30-day SEC Yield <sup>2</sup>	Net Expenses <sup>1</sup>
MMIT	NAV	-0.08%	-0.08%	4.55%	3.13%	1.09%	2.60%	3.30%	0.30%
	Market Price	-0.03%	-0.03%	4.57%	3.15%	1.11%	2.61%		

Returns represent past performance which is no guarantee of future results. Current performance may be lower or higher. Investment return and principal value will fluctuate, and shares, when redeemed, may be worth more or less than their original cost. Visit [nylim.com](http://nylim.com) for the most recent month-end performance. Expenses stated are as of the fund's most recent prospectus.

1. Performance reflects a contractual fee waiver and/or expense limitation agreement in effect until terminated by the board of Trustees of the ETF, without which total returns may have been lower. Without the contractual fee waiver, gross fees would have been 0.48% for MMIT.

2. The 30-Day SEC Yield is based on net investment income for the 30-day period ended 3/31/26, divided by the offering price per share on that date. Yield reflects a fee waiver and/or expense limitation agreement without which the 30-Day SEC Yield for MMIT would have been 3.13% for 3/31/26 respectively.

### About Risk

All investments are subject to market risk and will fluctuate in value. Before considering an investment in the Fund, you should understand that you could lose money.

**NYLI MacKay Muni Intermediate ETF (MMIT):** Municipal bond risks include the ability of the issuer to repay the obligation, the relative lack of information about certain issuers, and the possibility of future tax and legislative changes, which could affect the market for and value of municipal securities. Investing in below investment grade securities may carry a greater risk of nonpayment of interest or principal than higher-rated securities. **Liquidity risk** is the risk that certain securities may be difficult or impossible to sell at the time that the seller would like or at the price that the seller believes the security is currently worth. **Income Risk**, the Fund's income may decline when interest rates fall or if there are defaults in its portfolio. This decline can occur because the Fund may subsequently invest in lower-yielding securities when securities in its portfolio mature or the Fund otherwise needs to purchase additional securities. Change to the "Principal Investment Strategies" Effective December 11, 2020, the Fund's principal investment strategy has been amended such that it will no longer purchase Municipal Bonds whose interest is subject to the federal alternative minimum tax. To the extent that the Fund already holds Municipal Bonds whose interest is subject to the federal alternative minimum tax, the Subadvisor may elect not to immediately sell such securities and the Fund may continue to hold the securities until their maturity or sale at a later date. Investors should refer to the prospectus for additional information regarding this change. The **Bloomberg Municipal Bond Index 1-15 Yr Blend** covers the USD-denominated long-term tax exempt bond market. The index has four main sectors: state and local general obligation bonds, revenue bonds, insured bonds and prefunded bonds. Index results assume the reinvestment of all capital gain and dividend distributions. An investment cannot be made directly into an index.

The Morningstar Rating™ for funds, or "star rating", is calculated for managed products (including mutual funds, variable annuity and variable life subaccounts, exchange-traded funds, closed-end funds, and separate accounts) with at least a three-year history. Exchange-traded funds and open-end mutual funds are considered a single population for comparative purposes. It is calculated based on a Morningstar Risk-Adjusted Return measure that accounts for variation in a managed product's monthly excess performance, placing more emphasis on downward variations and rewarding consistent performance. The Morningstar Rating does not include any adjustment for sales loads. The top 10% of products in each product category receive five stars, the next 22.5% receive four stars, the next 35% receive three stars, the next 22.5% receive two stars, and the bottom 10% receive one star.

Consider the Funds' investment objectives, risks, charges, and expenses carefully before investing. The prospectus and summary prospectus include this and other information about the Funds and are available by visiting the [Prospectus](#). Read the prospectus carefully before investing.
