- Acquired by New York Life Insurance Company in 1984

PORTFOLIO MANAGEMENT TEAM

Edward Silverstein, CFA
Senior Managing Director
31 Years Experience

Thomas Wynn, CFA
Managing Director
43 Years Experience

MacKay Shields' Convertible Team is an equity-oriented convertible bond manager. Our Convertible Bond strategy seeks to maximize total return by outperforming the market and our competition while managing against downside risk. The strategy utilizes full analysis of the capital structure to determine which security provides the best risk/reward trade-off for investment.

MacKay Shields Sector Breakdown vs. ICE BofA All U.S. Convertibles Index (% Market Value)

Quality Breakdown (%)

1. ICE BofA Research/Bloomberg
2. ICE BofA utilizes its own composite scale, similar to those of Moody's, S&P and Fitch, when publishing a composite rating on an index constituent (eg. BBB3, BBB2, BBB1). Index constituent composite ratings are the simple averages of numerical equivalent values of the ratings from Moody's, S&P and Fitch. If only two of the designated agencies rate a bond, the composite rating is based on an average of the two. Likewise, if only one of the designated agencies rates a bond, the composite rating is based on that one rating. An index composite rating is the average of its constituent security composite ratings, weighted by full market value.
3. The top ten issuers described above were chosen based on objective non-performance based criteria and do not represent all of the securities in the portfolio. The top ten issuers represent the ten largest holdings as a percentage of the total value of assets under management for the representative account. It should not be assumed that the issuers described above were or will be profitable.
4. Rated securities provided with the S&P rating. Representative account securities rated NR have been provided with MacKay Shields' internal rating.

The representative portfolio was selected because it is the largest account in the composite and not for performance reasons. Each client account is individually managed, actual holdings will vary for each client and there is no guarantee that a particular client's account will have the same characteristics. It may not precisely represent every portfolio in the composite. Portfolio is actively managed and subject to change without notice. Provided as supplemental information to the GIPS reports on the following page. Unless otherwise noted, characteristics presented herein are gross characteristics and do not reflect the deduction of fees and expenses. This document is for informational purposes only. It is not possible to invest directly into an index. See last page for additional disclosures, including disclosures related to comparisons to an index and average credit quality.

1. As of December 31, 2025, includes MacKay Shields LLC and its subsidiaries.

1. ICE BofA All Convertibles Index

The Convertible Composite includes all discretionary convertible accounts managed with similar objectives for a full month, including those accounts no longer with the firm. This strategy primarily consists of convertible securities such as bonds, debentures, corporate notes, and preferred stocks or other securities that are convertible into common stock or the cash value of a stock or a basket or index of equity securities. The strategy may invest in debt securities that are rated investment grade and below investment grade or, if unrated, that we determine to be of equivalent quality. Gross-of-fees composite performance reflects reinvestment of income and dividends and is a market-weighted average of the time-weighted return, before advisory fees and related expenses, of each account for the period since inception. Through 1996, net-of-fees composite performance is derived by reducing the quarterly gross-of-fees composite returns by .125%, our highest quarterly fee. Subsequently, net-of-fees composite performance is derived by reducing the monthly gross-of-fees composite returns by .0417%, our highest monthly fee. Policies for valuing investments, calculating performance, and preparing GIPS reports are available upon request. GIPS® is a registered trademark of CFA Institute. CFA Institute does not endorse or promote this organization, nor does it warrant the accuracy or quality of the content contained herein. Performance is expressed in US Dollars. The composite inception date is 1/1/90. The composite creation date is 1/1/01. All portfolios in the composite are fee-paying portfolios. There can be no assurance that the rate of return for any account within a composite will be the same as that of the composite presented. **Past performance is not indicative of future results.**

MacKay Shields claims compliance with the Global Investment Performance Standards (GIPS®) and has prepared and presented this report in compliance with the GIPS standards. For GIPS purposes, the firm includes assets managed by MacKay Shields LLC and the Emerging Market Debt investment team of its affiliate, NYL Investments UK LLP, who have been appointed as officers of MacKay Shields. MacKay Shields LLC is an SEC registered investment advisor. The firm has been independently verified from January 1, 1988 through December 31, 2024. The verification report is available upon request. A firm that claims compliance with the GIPS standards must establish policies and procedures for complying with all the applicable requirements of the GIPS standards. Verification provides assurance on whether the firm's policies and procedures related to composite and pooled fund maintenance, as well as the calculation, presentation, and distribution of performance, have been designed in compliance with the GIPS standards and have been implemented on a firm-wide basis. Verification does not provide assurance on the accuracy of any specific performance report. A list including composite descriptions, pooled fund descriptions for limited distribution pooled funds, and broad distribution funds is available upon request. The primary benchmark for this composite is the ICE BofA All Convertibles Index. The CS First Boston Convertible Index was the primary benchmark for this product until 1/1/05. It was removed because CS First Boston ceased publication of this index. Indices do not incur management fees, transaction costs or other operating expenses. Investments cannot be made directly into an index. The ICE BofA All Convertibles Index is referred to for comparative purposes only and is not intended to parallel the risk or investment style of the portfolios in the MacKay Shields Composite. Internal dispersion is calculated using the equal-weighted standard deviation of annual gross returns of those portfolios that were included in the composite for the entire year. The three-year annualized standard deviation measures the variability of the composite gross returns and the index returns over the preceding 36-month period.

Comparisons to an Index

Comparisons to a financial index are provided for illustrative purposes only. Comparisons to an index are subject to limitations because portfolio holdings, volatility and other portfolio characteristics may differ materially from the index. Unlike an index, portfolios within the composite are actively managed and may also include derivatives. There is no guarantee that any of the securities in an index are contained in any managed portfolio. The performance of an index may assume reinvestment of dividends and income, or follow other index-specific methodologies and criteria, but does not reflect the impact of fees, applicable taxes or trading costs which, unlike an index, may reduce the returns of a managed portfolio. Investors cannot invest in an index. Because of these differences, the performance of an index should not be relied upon as an accurate measure of comparison.

Index Descriptions

The ICE Bank of America All U.S. Convertibles Index

An unmanaged index that consists of convertible bonds traded in the U.S. dollar denominated investment grade and non-investment grade convertible securities sold into the U.S. market and publicly traded in the United States. The Index constituents are market value weighted based on the convertible securities prices and outstanding shares, and the underlying index is rebalanced daily.

Average Credit Quality Disclosure

Average credit quality figures provided for information purposes only and are based on internal calculations by MacKay Shields using data obtained from independent third party rating agencies and internal ratings assigned to securities that are unrated by third party rating agencies. The average credit quality of a portfolio or fund is not obtained from, nor calculated by, third party rating agencies. No representation or warranty is made as to the accuracy of such calculations, or the accuracy of information provided by third parties.

Note to Canadian Investors: The information in these materials is not an offer to sell securities or a solicitation of an offer to buy securities in any jurisdiction of Canada. In Canada, any offer or sale of securities or the provision of any advisory or investment fund manager services will be made only in accordance with applicable Canadian securities laws. More specifically, any offer or sale of securities will be made in accordance with applicable exemptions to dealer and investment fund manager registration requirements, as well as under an exemption from the requirement to file a prospectus, and any advice given on securities will be made in reliance on applicable exemptions to adviser registration requirements.

Past performance is not indicative of future results.

Convertible securities are subject to a risk of loss. Convertible securities may be subordinate to other securities. The total return for a convertible security depends, in part, upon the performance of the underlying stock into which it can be converted. Additionally, an issuer may encounter financial difficulties which could affect its ability to make interest and principal payments. If an issuer stops making interest and/or principal payments, an investor could lose its entire investment. There can be no assurance that investment objectives will be met and there is no guarantee against loss.
