**Securitized Income**

Securitized Income seeks to outperform the benchmark through top-down analysis and bottom-up security selection. The strategy invests in securitized assets, including agency and non-agency mortgage-backed securities (MBS), asset-backed securities (ABS) and commercial mortgage-backed securities (CMBS).

**Asset Allocation Applications**

Securitized strategies serve various functions in an asset allocation. The securities in these strategies can offer attractive risk adjusted returns relative to other high-quality assets. They can provide an alternative to other fixed income asset classes and allow investors to diversify credit and interest rate risk. Furthermore, structured product strategies can be a more liquid alternative to private asset allocations.

1. Bloomberg U.S. Securitized Index See disclosures for index description. 2. OAS = Options Adjusted Spread. 3. The sum total may be greater than 100% due to short term cash equivalents related to forward settling To Be Announced (TBA) trades. The representative account utilized for this analysis was selected because it is the only account in the MacKay Shields Securitized Income strategy and not for performance reasons. Each client account is individually managed, actual holdings will vary for each client and there is no guarantee that a particular client's account will have the same characteristics. It may not precisely represent every portfolio in the composite. Unless otherwise noted, characteristics presented herein are gross characteristics and do not reflect the deduction of fees and expenses. #### 1. Bloomberg US Securitized Index

The Securitized Income Composite includes all discretionary securitized income accounts managed with similar objectives for a full month, including those accounts no longer with the firm. This strategy is benchmark aware, investing in primarily structured product bonds across residential MBS, commercial MBS & asset backed securities. The Securitized Income Composite was previously named the Structured Product Total Return Composite. Gross-of-fees composite performance reflects reinvestment of income and is a market-weighted average of the time-weighted return, before advisory fees and related expenses, of each account for the period since inception. Net-of-fees composite performance is derived by reducing the monthly gross-of-fees composite returns by .025%, our highest monthly fee. Policies for valuing investments, calculating performance, and preparing GIPS reports are available upon request. GIPS® is a registered trademark of CFA Institute. CFA Institute does not endorse or promote this organization, nor does it warrant the accuracy or quality of the content contained herein. Performance is expressed in US Dollars. The composite creation and inception date is 10/1/19. All portfolios in the composite are fee-paying portfolios. There can be no assurance that the rate of return for any account within a composite will be the same as that of the composite presented. **Past performance is not indicative of future results.**

MacKay Shields claims compliance with the Global Investment Performance Standards (GIPS®) and has prepared and presented this report in compliance with the GIPS standards. For GIPS purposes, the firm includes assets managed by MacKay Shields LLC and the Emerging Market Debt investment team of its affiliate, NYL Investments UK LLP, who have been appointed as officers of MacKay Shields. MacKay Shields LLC is an SEC registered investment advisor. The firm has been independently verified from January 1, 1988 through December 31, 2024. The verification report is available upon request. A firm that claims compliance with the GIPS standards must establish policies and procedures for complying with all the applicable requirements of the GIPS standards. Verification provides assurance on whether the firm's policies and procedures related to composite and pooled fund maintenance, as well as the calculation, presentation, and distribution of performance, have been designed in compliance with the GIPS standards and have been implemented on a firm-wide basis. Verification does not provide assurance on the accuracy of any specific performance report. A list including composite descriptions, pooled fund descriptions for limited distribution pooled funds, and broad distribution funds is available upon request. Indices do not incur management fees, transaction costs or other operating expenses. Investments cannot be made directly into an index. The Bloomberg US Securitized Index is referred to for comparative purposes only and is not intended to parallel the risk or investment style of the portfolios in the MacKay Shields Composite. Internal dispersion is calculated using the equal-weighted standard deviation of annual gross returns of those portfolios that were included in the composite for the entire year. The three-year annualized standard deviation measures the variability of the composite gross returns and the index returns over the preceding 36-month period. The standard deviation is not presented for periods prior to 2022 because the composite did not have a three-year track record.

### **COMPARISONS TO AN INDEX**

Comparisons to a financial index are provided for illustrative purposes only. Comparisons to an index are subject to limitations because portfolio holdings, volatility and other portfolio characteristics may differ materially from the index. Unlike an index, portfolios are actively managed and may also include derivatives. There is no guarantee that any of the securities in an index are contained in any managed portfolio. The performance of an index may assume reinvestment of dividends and income, or follow other index-specific methodologies and criteria, but does not reflect the impact of fees, applicable taxes or trading costs which, unlike an index, may reduce the returns of a managed portfolio. Investors cannot invest in an index. Because of these differences, the performance of an index should not be relied upon as an accurate measure of comparison.
